ULTRA-MINI EXCAVATOR

SV08-1C

[Gross] 7.7kW <10.3HP>

SV08-1C

Designed to work
in confined spaces

BUILDING
WITH YOU

680mm

Retracted undercarriage width (folded blade)

840mm

Extended undercarriage width (extended blade)

Sliding Variable Undercarriage

The undercarriage retracts to 680mm to fit through narrow passages and extends to 840mm for stability while working.

Simple Folding Extendable Blade

The hinged blade extensions are permanently fixed to the blade. No tools required to change the width of the blade. No risk of losing the blade extensions.

Remove the pin.

Fold it.

Insert the pin to secure.

Robust Structure

YANMAR ORIGINAL

You can extend it independently with a separate lever. Robust structure prevents rattling. When the undercarriage is retracted, the soil is forcibly removed away.

Excellent performance in a small package

305mm Ultra small rear overhang

Ultra Small Turning Radius

The super compact design features an ultra small turning radius of 725mm and keeps rear overhang to just 305mm. It ensures safe operation in confined spaces.

Foldable ROPS* Bar

Foldable ROPS bar minimizes the damage in case of an accident. Folds down to allow pass through height restricted passages.

High Performance Engine

High performance engine provides a powerful boost for tough works.

Clean and Low-Noise

Ultra-low noise design, friendly to people and the environment.

Low and High Speed Traveling

Save time by traveling faster around your job site.

* Roll-Over Protective Structure (ROPS): A structure to protect the operator wearing a seat belt, in case the machine rolls over.

Easy maintenance and enhanced safety

Wide-open bonnet.

Bucket cylinder hose designed inside the arm.

The boom hose and cylinder are covered for protection.

The blade cylinder is protected with a special guard.

Lifting Capacity

With: ROPS bar and rubber track
Without: Bucket

A: Reach from swing center line [m (in.)]

B: Load point height [m (in.)]

C: Lifting load [kg (lbs.)]

P: Load point

: Rating over front

: Rating over side or 180 degrees

Loads shown in table include weight of standard bucket [18kg (40lbs.)].

Note:

The lifting load with the asterisk (*) mark is limited by hydraulic lifting capacity rather than tipping. The lifting capacity shown in the above list is based on the ISO Standard No. 10567 and represents either 87% of hydraulic lifting capacity or 75% of tipping load, which is smaller.
